

PALEANI
ENGINEERING

The Paleani Engineering is a Society of Italian professionals that proposes to promote in Canada the Italian style.

The objective is to find some Canadian partners concerned in the realization of commercial centers, shops, hotels, private houses and villas drawn according to the Italian style, both as architectural structures and inside furnishings. We propose to our potential clients a "ready to use" project: the furniture will be designed and created in Italy by Italian industry or/and Italian artisans using only Italian materials obviously in collaboration with Canadian design studios. Our aim is to give to Canadian building Companies the opportunity to propose also an Italian design.

La Paleani Engineering è una società di professionisti italiani che si propone di promuovere in Canada lo stile italiano.

L'obiettivo è quello trovare dei partners Canadesi interessati nella realizzazione di centri commerciali, alberghi e ville, progettate secondo lo stile italiano, sia come strutture architettoniche, sia come arredamento di interni. Proponiamo ai nostri potenziali clienti un "chiavi in mano" progettazione e fornitura di arredi interni realizzati da artigiani italiani con materiali italiani. Il tutto in collaborazione con Studi di Progettazione Canadesi.

Il nostro obiettivo è quello di dare alle Imprese di Costruzione la possibilità di proporre un prodotto italiano di design.
